SUMMARY OF TABLES.

In 1903 there were received 49,289 applications for mechanical patents, 770 applications for design patents, 154 applications for reissues of patents, 2,504 applications for registration of trade-marks, 1,234 applications for registration of labels, and 380 applications for registration of prints. There were 31,582 patents issued, including designs, 117 patents reissued, 2,186 trade-marks registered, 990 labels, and 270 prints. The number of patents that expired was 21,797. The number of allowed applications awaiting the payment of final fees was 10,545. The number forfeited for non-payment of the final fees was 5,236. The total expenditures were $1,448,645.81. The receipts over expenditures were $193,556.00. The total balance to the credit of the Patent Office in the Treasury of the United States on January 1, 1904, was $5,682,540.61.

In proportion to population more patents were issued to citizens of Connecticut than to those of any other State—one to every 996. Next in order are the following: District of Columbia, 1 to every 1,063; Rhode Island, 1 to every 1,224; Colorado, 1 to every 1,335; Massachusetts, 1 to every 1,348; California, 1 to every 1,516; New Jersey, 1 to every 1,533; New York, 1 to every 1,589; Illinois, 1 to every 1,715; Ohio, 1 to every 1,928; Pennsylvania, 1 to every 2,004; Washington, 1 to every 2,252; Michigan, 1 to every 2,548; Missouri, 1 to every 3,173; Indiana, 1 to every 3,193; Arizona Territory, 1 to every 3,235; Montana, 1 to every 3,244; Nevada, 1 to every 3,256; Oregon, 1 to every 3,308; Wisconsin, 1 to every 3,342; Minnesota, 1 to every 3,495; Maryland, 1 to every 3,500; Iowa, 1 to every 3,559; New Hampshire, 1 to every 3,741; Utah, 1 to every 3,791; Nebraska, 1 to every 3,857; Delaware, 1 to every 4,198; Wyoming, 1 to every 4,205; South Dakota, 1 to every 4,364; Kansas, 1 to every 4,402; Oklahoma Territory, 1 to every 4,474; North Dakota, 1 to every 4,693; Idaho, 1 to every 5,055; Maine, 1 to every 5,106; Vermont, 1 to every 5,454; West Virginia, 1 to every 6,307; Texas, 1 to every 7,024; Kentucky, 1 to every 7,751; Florida, 1 to every 7,888; New Mexico Territory, 1 to every 8,491; Virginia, 1 to every 8,829; Louisiana, 1 to every 9,661; Tennessee, 1 to every 9,714; Georgia, 1 to every 10,074. The fewest patents granted in proportion to the number of inhabitants were in the following States and Territories: Mississippi, 1 to every 22,161; Alaska Territory, 1 to every 21,147; South Carolina, 1 to every 17,635; Arkansas, 1 to every 16,814; North Carolina, 1 to every 15,150; Alabama, 1 to every 13,646; Hawaii Territory, 1 to every 11,846; Indian Territory, 1 to every 10,887.

As to foreign patents, 1,065 were granted to residents of England; 1,053 to those of Germany; 440 to those of Canada; 321 to those of France; 136 to those of Austria-Hungary; 110 to those of Scotland; 78 to those of Switzerland; 76 to those of Sweden; 59 to those of Belgium; 50 to those of Victoria; 48 to those of New Zealand; 46 to those of Russia; 36 to those of Denmark; 30 to those of Italy; 24 each to those of Ireland and the Netherlands; 22 to those of Mexico; 20 to those of New South Wales; 18 to those of Norway; 16 to those of Transvaal; 10 to those of Argentina, 9 to those of Cuba; 8 to those of South Australia; India and Spain, 7 each; Japan and Roumania, 6 each; Brazil and Queensland, 5 each; South Africa and Western Australia, 4 each; Algeria, Guatemala, and Tasmania, 2 each, and Bolivia, British Honduras, British West Indies, Cape Colony, Chile, China, Costa Rica, Honduras, Jamaica, Java, Natal, Newfoundland, Portugal, and Turkey, 1 each.

The Patent Office issued 31,699 patents during the year 1903, the largest annual issue in its entire history.

The total number of trade-marks, prints, and labels registered for the year 1903 was 3,446, the largest issue of certificates of registration in the history of the Office.

The condition of the examining divisions upon December 31 is indicated by the fact that of the 38 divisions 23 were then taking up new cases for action within one month from the date of filing, and the remaining 15 were in arrears between one and two months. The total number of cases awaiting action on the part of the Office upon December 31 was 10,423.

The business transacted by the Patent Office during the calendar year 1903 has again exceeded all previous records, as appears in the foregoing tables. The preceding statement showing the number of patents and certificates of registration issued from year to year shows that uniform growth which indicates that the business of this Office is an accurate index of general conditions of prosperity in the industrial arts of this country, and the comparison hereinbefore made between the chief financial and work elements of this Office for the years 1899 and 1903 permits the rate of this increase to be accurately stated. From this statement it appears that in four years the average increase of business, as shown by the receipts, expenditures, applications filed, issues and copies of patents and records furnished, is 23 per cent., and this work has been accomplished with an increase of 8.8 per cent. in the number of employees. The work has been transacted as well as could be expected, in view of the force employed and the volume of the work, and has been without particular incident.

There is no reason to expect that the increase shown in the foregoing tables may not be found in the ensuing year, and it is evident that the force of employees will not be able to meet the requirements of an indefinite further increase of the work unless their number shall be correspondingly increased. Already there are delays in the transaction of our work and haste in the execution of other portions of the work which point to the imperative necessity for more employees.

The increase in work has made it necessary to organize a new division, known as the Manuscript and Photolithograph Division, and there should be added to the present force a new chief of division and assistant chief for the purposes of this new division. I have also asked for ten additional

clerks of class 1, at $1,200 per annum, to meet our most urgent necessities.

The increase of the appropriation for the scientific library of this Office from $2,000 to $2,500, made by the appropriation bill of last year, was a step in the right direction, and if this sum can be further increased, so as to furnish $4,000 per annum for the purposes of this library and for the transportation of publications of patents to foreign governments, I think the library can be maintained in a condition of efficiency.

One cannot look at the progress of the Patent Office since its present system of work was inaugurated by the act of July 4, 1836, without seeing that it has followed closely the development of the industrial arts in this country during all of this period, and it should require no extended argument beyond these figures to show that the system which has accomplished these results without expense to the Government, but which has, on the contrary, furnished a net balance of $5,682,540.61, should be furnished with all necessary facilities in the way of room and employees, so as to permit its future progress in the same measure as the expected growth of the arts in this country.

It was to me a matter of great interest last summer to be shown at Berlin the plans of the German Government for an extension of their patent office, which has been the first in Europe to follow the procedure of this country in the matter of granting patents by the establishment of a system of preliminary examination. Lands have been purchased by the German Government, and plans for buildings are now in hand which are to provide accommodation for 2,000 employees, and it was stated to me that such accommodation, it was thought, would suffice for their necessities until the year 1920. It is interesting to notice that the annual issue of patents by the German Government is about six thousand, and that our issue for the year 1903 was 31,699. It is to be hoped that Americans will not be obliged to look to Germany at any time in the next decade to see the best embodiment in practice of the system of issuance of patents upon preliminary examinations. If they have concluded that this system originated by us lies so close to the national welfare that they have decided to make great expenditures to possess themselves of its benefits, funds should not be wanting in this country to keep our system up to its present position of preëminence. The stimulus given to the industrial arts by the hope of reward which the patent system presents to the inventor is conceded by the thinking men of most civilized countries to-day, and the rapid progress of Japan has been accompanied with the adoption of a patent system in which they were largely influenced by impressions derived from an examination of the patent system of the United States.

At the present time the space provided for the Patent Office is inadequate, and it is very desirable that some plan looking to an extension of working room for the Patent Office shall be adopted without delay, since the present space will be insupportably crowded at the present rate of increase before any new building could be built to contain this Office. Our necessities are growing, while there seems to be as yet no plan for our relief in this regard. The matter is of the utmost concern to all friends of the patent system, and nothing but action in the direction of larger accommodation will save the work of this Office from difficulties plainly apparent and not far ahead in point of time. This subject is of such transcendent importance to this Bureau that I respectfully urge your earnest attention to it.

Respectfully submitted,

F. I. ALLEN,
*Commissioner of Patents.*
